

Version 2.3.3, Changes Since 2.3.2

High Importance

- Bug: Excluding the Everyone group in group settings also blocks external users
 - Fix: External users are now in a separate system managed group so they are not affected by settings on the Everyone group
- Bug: The top row of the text colour palette in the Webfolio editor is cut off by the window frame
 - Fix: The colour palette has been repositioned to allow access to the top row
- Bug: Entering more detail about an activity in the experience asset without entering an activity title results in the details being lost
 - Fix: It is now not possible to add more detail without entering an activity title
- Bug: The notification bell on the Gateway is the wrong way round, it shows when there is nothing new and disappears when an item has been changed
 - Fix: This has now been corrected, the bell is displayed when an asset has been updated
- Bug: Entering HTML into a comment produces an error
 - Fix: HTML is now accepted and is displayed as plain text in a comment
- Bug: Deleting a locked Gateway leaves all assets locked
 - Fix: Gateways asset are now automatically unlocked before the Gateway is deleted

Medium Importance

- New: Allow centred images in Webfolios
 - Added an option to create a section which only contains a centred image
- New: Added panel wrapping options to proformas, allows panels to be wrapped or kept on a single line when there are more than three panels
 - Panels used to wrap after three panels in older versions of PebblePad, this was changed to show on a single line which broke the layout of some Proformas. This option allows panels to be displayed in the old style to preserve layout.
- New: Added sign-out link to the external user shares list
 - Allows users to sign out of an external account without having to completely close the browser
- New: Added option to delete Gateway archives
 - Allows Gateway archive created by mistake to be removed
- New: Added search feature to My Contacts
 - Allows contacts in My Community to be found more easily
- New: Better information for locked assets
 - It is not always obvious why an asset has been locked, an option has been added which shows the path from an asset back to the locked Gateway

- New: Added last viewed to rollover on recipient list
 - Displays the last time a recipient has viewed an asset in the asset synopsis pad
- New: Revised qualification display in CV to use qualification dates in preference to affiliation dates
 - The affiliation date was used in preference to the dates on a qualification, this has now changed so the qualification dates are used if set
- New: Support files other than index/default.htm(l) for websites
 - This allows exports from Sakai to be imported as websites
- New: Revised poster details on comments posted to publicly shared assets.
 - This has been changed to "Posted Anonymously" when no name is entered for a comment and appends "(Unverified)" when there is a name
- Bug: Unable to copy profile responses from the Gateway resource section
 - Fix: This has now been resolved, the bug did not affect profile definitions which is the normal use of profiles as resources.
- Bug: If you add a hyperlink to the first word of a Webfolio page and then click on the first letter of the link in the editor page the movie crashes
 - Fix: This has now been resolved
- Bug: The count of assets to be copied is not accurate
 - Fix: This has been changed to exactly match the number of items that will be added in the asset store
- Bug: PebblePad stores the local path of uploaded files as the filename when uploading from some browsers, this causes error when exporting
 - Fix: Local path information is removed during upload
- Bug: There is no confirmation when deleting a group or group member from My Community
 - Fix: A prompt is displayed before remove a group or group member from the community
- Bug: There is no confirmation when deleting groups in admin area
 - Fix: A prompt is displayed before remove a user or group from the community
- Bug: Upload website pad displays undefined for the file type
 - Fix: The upload pad now displays "zip file" for the file type
- Bug: 'Not Tagged' can appear as an option in the dropdown box after tagging and untagging an asset
 - Fix: 'Not Tagged' does not appear as an option
- Bug: At the moment there is no way to remove publicly shared Proformas without deleting the Proforma
 - Fix: Added option to unshare a Proforma from all users
- Bug: Save icon not working on review, the user is still prompted on closing the review

- Bug: Posts edited in the blog preview have double the number of line breaks when viewed in the main interface
 - Fix: The line breaks are now consistent between the blog and main interface
- Bug: It is not possible to change qualification fields after viewing a locked item in About Me
 - Fix: This has now been resolved
- Bug: Error when creating a Webfolio templates in an account which has no files
 - Fix: The user's file store area is not present until they upload a file, this is now checked before attempting to save a template
- Bug: The 'save and close' tick for the action plan and meeting records does not respond after you have been in about me.
 - Fix: This has now been resolved
- Bug: Upload window opens too small on 1024x768 and cannot be resized. This is due to the upload window opening too far down the screen and IE6 not allowing a window to open with its status bar off the screen
 - Fix: The window is now opened in the top left and can be resized
- Bug: Adding a file to comment with no title loses the selected file when the submission fails
 - Fix: The presence of a title is now checked before submitting
- Bug: Gateway permissions page slow to load when there are lots of users in groups
 - Fix: Only a small number of users are displayed on the page and the full list is loaded on demand
- Bug: There is no indication when a Gateway group is linked to a Student management system
 - Fix: The groups access method now shows that the group is linked
- Bug: There is no way to unlink a Gateway group from a Student management system
 - Fix: An unlink option has been added on the permissions page
- Bug: Trying to view a Gateway that doesn't exist produces an error page
 - Fix: The user is now sent to the missing item page
- Bug: A gateway creator can always publish to the gateway
 - Fix: The creator can no longer publish to a locked Gateway

Low Importance

- New: Added next 50 / last 50 paging buttons for received assets
 - Improves performance with large numbers of received assets
- Bug: Long Proforma names run out the title area of the pad
 - Fix: Long Proforma names are now truncated
- Bug: Quick share blind not closing on rollout
 - Fix: This has now been resolved
- Bug: Manually locking a Gateway does not record the name of the person who locked the

Gateway in the history

- Fix: The name of the person who locks the Gateways is now recorded
- Bug: The home pad link is not updated when grades are released
 - Fix: The assets are now marked as updated making them appear bold

Version 2.3.2, Changes Since 2.3.1

High Importance

- Bug: Archiving profile responses on gateways leads to permission denied errors
 - Fix: This has now been resolved, profiles can be archived
- Bug: Signup email is missing installation url
 - Fix: The links have been restored in the signup email, this only affects PebblePad managed account in version 2.3.1

Medium Importance

- New: Asset Validation in Gateways
 - Allows assets published to a Gateway to be marked as having met an externally defined set of requirements
- New: Gateway filtering by tag/assessor
 - Added new filter options to find assets with a certain tag or that have been marked by a certain person
- New: Revised Proforma feedback options
 - Added a "Use Proforma" button to make it obvious when a Proforma is being used for feedback
- New: Add tag information to view asset page
 - A list of default tags that an item is tagged with is now available on the asset preview page

Version 2.3.1, Changes Since 2.3.0

High Importance

- Bug: Download links are still present in a file asset even when no file has been uploaded, attempting to view the file produces an error.
 - Fix: The link have been replaced with text explaining why the links are not present
- Bug: If a user has enabled the TTS avatar but the TTS service is temporarily offline PebblePad runs extremely slowly.
 - Fix: The avatar now checks that the service is running before starting
- Bug: Missing emails on large installs
 - Fix: The standard .NET mail provider does not cope well with high load, this has now been replaced with a 3rd party replacement to resolve issues with missing emails.

Medium Importance

- New: General tabbing improvements
- New : 2nd password for mobile and RSS access
 - Users who only access PebblePad through single sign-on will now be prompted to enter a second password which they can use to access RSS feeds and mobile versions of PebblePad.
 - This feature does not apply to installs which do not exclusively use single sign-on
- Bug: The count of hours on activity log is rounded down
 - Fix: Entered minutes were being ignored on the activity log, these are now counted towards the total
- Bug: Custom Webfolio templates can be saved without a title
 - Fix: Title is now required for custom templates
- Bug: Problems with large documents and PowerPoint in Zoho
 - Fix: This can only be fully resolved by Zoho, to limit the possibility of lost work the edit size limit in has been lowered to 512KB to prevent users opening large complex documents which are likely to be damaged by editing.
- Bug: Unable to view images on shared an published CVs
 - Fix: The images now correctly inherit their permissions from the CVs they are posted to

Version 2.3.0, Changes Since 2.2.2

High Importance

- New: Multiple inline images in Webfolios
 - New advanced Webfolio editor which can be used in place of the original editor.
 - Splits pages into sections which can be reordered
 - Each section can have its own picture which can be left or right aligned and resized
- New: Reporting
 - Statistics page improvements
 - Report on groups defined in group settings
 - View statistics from previous days
 - CSV export for all sections
 - Timeline feature provides graphs of
 - Account usage
 - Asset type usage
 - Upload space usage
 - Collaboration
 - Report of all publicly shared assets with frequency of access

- New: Beta Turn It In compatibility (*Limited release for piloting and evaluation*)
 - Per-asset originality report
 - Submission from Gateways and individually
- New: Institution desktop theme tool for site-licence holders
 - Provides the customisation options available in the individual custom desktop option as a desktop that can be set as the default theme.
- Bug: Import from another portfolio is disabled due to security changes in Flash 10
 - Fix: The compatibility issues have been resolved, this option is now available again.

Medium Importance

- New: Improving transparency of Gateway permissions
 - Provides information about important Gateway details include
 - Owner
 - Permissions
 - Closing date
- New: Searching and filtering on Gateways
 - Allows assets published to a Gateway to be filtered by
 - Date published/last changed
 - Published by/Title/Type
 - Status - feedback, discussion, etc.
- New: Zoho integration
 - Allows editing of Microsoft Office and OpenOffice.org documents directly from PebblePad
 - Supports documents, spreadsheets and presentations
- New: Self subscribe Gateways
 - A form of open access Gateway which is only available to authenticated PebblePad users
- Bug: Poor performance in Gallery and Community
 - Fix: The Gallery and community have been altered to reduce the amount of time before they are ready to be used
- Bug: Ctrl + s in the Webfolio editor removes all formatting from the page
 - Fix: The Ctrl+S shortcut is now ignored by the Webfolio editor
- Bug: The *send to...* gateways does not display open access gateways created in 2.2.0 or above
 - Fix: Newly created open access Gateway's were not correctly marked as open access, this has now been resolved
- Bug: The public share url uses an invalid url for newly created assets.

- Fix: The url has been corrected for new assets
- Bug: 'post new' button is shown on publicly shared blog
 - Fix: The post new button is now only shown to authenticated users who have permission to post. Only authenticated users (internal or external) can post to a public blog though any user can comment where that permission has been applied.
- Bug: Creating and deleting many new items results in only a few items being display in the asset store even when there are more than 50 items
 - Fix: Trashed assets were being counted towards the 50 asset per page limit, this has now been fixed

Low Importance

- New: 'Turn off accessibility' option on avatar panel
- New: Webfolio page title can now be edited on the page selection pad
- New: Option to manually clear notification bell from viewed assets
- Bug: Duplicate items in Gateway breadcrumb trail
 - Fix: Action within a page could cause duplicates to appear in the breadcrumb trail, this has now been resolved
- Bug: 'Comments about this' panel is shown on assets which only have locked feedback
 - Fix: Assets which only have locked feedback comments no longer display an empty comment section to users who do not have permission to view locked feedback
- Bug: It is possible to set a share expiration to a past data causing it to immediately expire
 - Fix: The expiration data for a share can now only be set to a date in the future
- Bug: Edit link is always shown on Proformas even when the person viewing does not actually have permission to edit
 - Fix: The link is only shown when the person viewing the Proforma has permission to edit
- Bug: Shared list shows 'undefined' after deleted the last asset in received
 - Fix: Deleting the last asset now show a blank list

Version 2.2.2, Changes Since 2.2.1

High Importance

- Bug: Changes to content in the accordions in thoughts and action plans are not saved when saving with the green tick, they only save with the disk icon
 - Fix: Changes to content within the accordions is now detected and saved with the tick
- Bug: Performance problem fetching create new Profile/Proforma list on large installs, the list can take a number of seconds to appear when a large number of Gateways exist.
 - Fix: Revised database queries to improve performance

Medium Importance

- Bug: Gateway owners are not able remove assets from Gateways, owner and administrator permissions are required.
 - Fix: Administrators used to be the only users able to remove assets from a Gateway, this right is now be an owner permission.
- Bug: Some hints do not show the correct context sensitive help
 - Fix: The hint links have been corrected
- Bug: It is not possible to delete automatically created tags that are no longer used
 - Fix: These tags can now be removed
- Bug: The Proforma builder form sometimes doesn't clear, so instead of adding a new element it edits the previous one
 - Fix: Adding a new item now always adds a new element
- Bug: Using apostrophes in Proforma questions causes the question to disappear
 - Fix: Apostrophes no longer cause problems in question titles
- Bug: Publishing a Profile or Proforma to an open access Gateways sends the item to everyone in the installation, it should only be available to Gateway members
 - Fix: Published Forms and Profiles published to a Gateway are only available to users who are members of the Gateway
- New: Support for proxy servers
 - PebblePad now supports accessing external content using a proxy server, please see the Readme.rtf file for more details
- New: CSV report for Proformas on a Gateway
 - A CSV file containing statistics for each Proforma resource on a Gateway is available in the Manage Resources section
- New: Link a Proforma to another Proforma for feedback purposes
 - When building a Proforma (A) it is possible to link another Proforma (B) for feedback/supporting statement purposes. On sharing a completed Proforma (A) with comment permissions the recipient is able to access via a link Proforma (B) to add feedback.
- New: Tags are now removed using check boxes
 - Tags can now be selected using check boxes for removal allowing multiple selection and providing a more intuitive interface.

Low Importance

- Bug: Leaving tag cloud open and opening About Me leaves the tag cloud on top of About Me
 - Fix: The tag cloud is now automatically closed when opening About Me
- Bug: Only global administrators are able to move Gateways but the option is displayed to normal Gateway administrators even though they cannot access the page
 - Fix: Removed the Move Gateway option for all users except global administrators

- Bug: Personal activity report counts assets in recycle bin
 - Fix: Assets in the recycle bin are no longer count in the activity report
- Bug: Apostrophes in text pasted from Word do not display correctly in Proformas
 - Fix: Smart quotes pasted from Word document are converted to normal quotes
- Bug: Some emails have hard-coded text for asset types
 - Fix: Customisable asset names are now used
- New: When deleting an asset the confirmation dialogue now shows the title of the asset
 - The confirmation previously displayed the type of asset being deleted, the title of the asset is now displayed too
- New: Error reporting improvements, added a problem description field when reporting and from the main interface and a reporting mechanism for errors in HTML pages.

Version 2.2.1, Changes Since 2.2.0

Medium Importance

- Bug: Gateway permission cache is not cleared when permissions are removed, this gives the temporary appearance of the permissions not having been removed
 - Fix: The permission cache is now cleared immediately so the correct permissions are reloaded the next time the page is refreshed
- Bug: The Gateway history and edit titles/dates pages were not checking for access correctly resulting in permission denied screens.
 - Fix: Tutors should not be able to access the history page, this has been removed from the menu except for owners and administrators. The permission check for titles/dates page has been altered to allow owners as well as administrators.
- Bug: Gateway pages are too wide for a 1024x748 monitor
 - Fix: Adjusted Gateway page layout to fit a 1024x768 display
- Bug: The 'add users' permission for the owner group is affected by the 'all tutor permissions' permission
 - Fix: Removed separate 'add users' permission for owners from Gateway groups page, this permission is part of the 'all tutor permissions' option
- New: Added an option to use a completed Proforma as a Webfolio as a special page
 - Previously tutors could include an empty Proforma as a Webfolio page, an option has now been added for all users in include a completed Proforma as a page

Version 2.2.0, Changes Since 2.1.5

High Importance

- New: Improved Gateway interface
 - Removed Gateway types, all Gateways now support assessment and have a resources area

- Multi-select items to release feedback, archive, export, etc
- New creation and management pages
- Merged Gateway resource management
- Finer grained permissions
- Restoring of archives

Medium Importance

- New: Allow proformas to be linked to gateways for feedback from the Proforma builder
- New: If there are more than 3 panels on a proforma 'column element', wrap columns.
- New: Added privacy option for questions on proformas
 - Private responses are completely hidden from everyone except the person who takes the Proforma
- New Added Likert style questions to Proforma
 - Includes the following fields: Title; Left scale label; Right scale label;
 - Scale size (selectable 3 – 10)

Version 2.1.5, Changes Since 2.1.4

High Importance

- Bug: Anonymous comments on assets not visible till login
 - Fix: Anonymously posted comments can now be seen by everyone

Medium Importance

- Bug: It is possible to select a module without selecting a qualification but the module is not displayed
 - Fix: Selecting a module automatically includes the qualification it belongs to
- Bug: When copying an asset between users, the new copy is shown in the original user's tags
 - Fix: The copied assets are tagged in the new user's asset store only
- Bug: The list of asset shown when clicking on the "received / updated asset list" was incorrect.
 - Fix: The list now shows the full list of newly received and updated assets
- Bug: If a change is made or a new tag is entered and the close icon is clicked the pad closes without prompting the user to save changes
 - Fix: A prompt is now shown before closing the pad
- Bug: If the tick is clicked instead of the plus icon when creating a new tag the 'saved' message appears but the tag is not saved

- Fix: New tags can now be saved using the tick or plus icons
- Bug: URLs longer than 100 characters are truncated on Webfolios
 - Fix: The length of a URL entered as a link in a Webfolio is no longer limited
- Bug: Changes made using the spellchecker or cutting and pasting do not trigger the close confirmation
 - Fix: Changes which are not directly caused by a user typing now trigger the close confirmation
- Bug: Filtering the asset store stops working after About Me has been used
 - Fix: Filtering is now unaffected by About Me

Low Importance

- New: Added a message before exporting to Word which warns that changes will not be saved back to PebblePad.
- New: Disaggregated group setting permissions in PebblePad Admin
 - Proforma and Profiler access can now be granted individually, multiple permissions can also be applied together
- New: Webfolio pages can now be edited from the page list
 - Previously page titles could only be edited with the page editor, they can now be changed within the page list too
- Bug: Print icon on asset preview does not trigger a print dialog
 - Fix: Printing of the asset is now triggered when the print icon is clicked
- Bug: No warning is shown when an invalid RSS feed has entered.
 - Fix: Added a message to indicate when an RSS feed cannot be used due to an incorrect URL
- Bug: Broken image and stylesheet links in the output from the send to word option
 - Fix: Removed broken links

Version 2.1.4, Changes Since 2.1.3

High Importance

- Bug: Administrators receive 'permission denied' error when trying to view assets reported as inappropriate content.
 - Fix: Granted administrator the correct permissions to view the files. These permissions were not correctly set for new installations of 1.4 and 2.0, they are present in installs upgraded from older versions.
- Bug: A problem was introduced into the asset importer in 2.1.3 which prevented it from linking imported assets together.
 - Fix: The changes made in 2.1.3 to cope with invalid files did not preserve filename information required to recreate links within Webfolio pages, this has now been fixed.

Medium Importance

- Bug: Filtering in the tag cloud does not work for tags which have an extended description
 - Fix: The asset store is correctly filtered to show the tagged assets.
- New: Text to Speech improvements
 - Added a male avatar, the avatar is automatically selected depending on the voice chosen.
 - Please note this requires the TTS service to be updated before it will function correctly, see the Readme.rtf for more details.
 - Added support for a default voice other than Microsoft Mary
- Bug: 'in date field arrows' appears in text fields when creating a new employment record that include dates.
 - Fix: Setting or altering a date no longer causes 'in date field arrows' to appear.
- Bug: Roll-overs do not appear on tags when tagging an asset or managing tags
 - Fix: Tag description roll-overs are now displayed when tagging an assets and managing tags
- Bug: The activity log counts hours from assets which are in the trash
 - Fix: Asset which are held in the trash can are no longer in the activity log
- Bug: It isn't possible to individually export a large Webfolio from a Gateway.
 - Fix: Altered the individual export to use the same multiple step process as the batch export, this allows it to export very large Webfolios.
- Bug: Upcoming deadlines appear on the homepad when importing action plans and meetings which do not have target date set.
 - Fix: The target date was being set to the current date when a target date couldn't found, the date is now left unset.
- Bug: There is no easy way to adjust a date range to move the start date past the end date.
 - Fix: The start date can now be set to a point beyond the end date of an item. If this is done the end date is cleared.

Low Importance

- Bug: The headings on the activity log display are not visible when using the Lighthouse template
 - Fix: The heading text is now displayed as black
- Bug: There is extra spacing around the headers in the action plan preview.
 - Fix: Removed the extra spacing above and below headers on action plans
- New: Added an option to the login page which opens a popup containing the main interface after login.
 - This allows help and instructional information on the login page to be preserved underneath the main interface.
