

C# .NET Developer

Job Description

We're looking for a talented and experienced full stack developer to help develop and manage our websites.

About you – Enthusiastic, skilled and have the potential to do great things. We need you to be a strong collaborator and able to succeed in a fast-paced environment. You will also need to be highly organised with a proven ability to work independently. Some development experience is a must, at least 3 years building complex websites and web applications is the minimum we're looking for. The more experience you have in the below stack the better:

- C# .NET
- ASP.NET Web Forms
- SQL
- JavaScript
- HTML / CSS
- SOAP and REST APIs
- SEO (good understanding of best practice)
- Use of SEO tools such as GSC to SEMRush
- CMS platforms such as FreshDesk
- Marketing platforms such as HubSpot

What you'll be doing:

- Creating, maintaining and improving our marketing websites.
- Optimising our websites for user experience, SEO and the latest web standards.
- Maintaining and improving our internally developed content management systems.
- Upgrading our code base. Large sections of this code are written in ASP.NET Web Forms, - alongside other upgrades - we are looking to update this to ASP.NET MVC, bringing it in line with our product code base.
- Working collaboratively with our product development teams to ensure all code is of the highest quality.
- Learning! You will be keeping up with best practices and emerging technologies to help us stay at the forefront of our industry.

About Us

PebblePad is a multi-award-winning company – big enough to operate globally, but small enough to value every team member within a culture that's inclusive, fun and vibrant. Our software is used by over 500k learners to help them plan for, make sense of, and showcase their unique experiences and talents. As a company we have striven for 15 years to influence learning, teaching and assessment.
