Related to	Enhancement Description
Word Count	Word count can be now added to a multi-line text element. Three options are available allowing, minimum, maximum or word count range to be set.
Template Reuse	Added to the builder is the ability to specify the number of times a template can be reused.
Radio Buttons	Ability to have 6 buttons/check boxes displayed horizontally.
Banners	Additional banners have been added to increase the number of design options for a user.
Workbooks	Users will now be offered the choice from a page holder to 'add new' or 'add existing'.

## V5 ATLAS Enhancements

---

Related to	Enhancement Description
------------	-------------------------

---

Locking assets	<p>Assets can now be locked upon submission to an assignment. Assignments have an additional setting that managers can turn on/off that will lock the asset once it is submitted. If the setting is turned off then assets will be unlocked. Unlocking also takes place if an asset is removed from the assignment.</p> <p>NOTE: the locking is only applied to the asset that is submitted and not to any child or linked assets. Locking of child and linked assets will be introduced in a later update.</p>
----------------	---

---

Locking pages on verification	<p>Pages within workbooks can be set to lock on verification. Workbook editors can set a lock on verification option against pages in the workbook builder. The lock will be enabled when an assessor verifies that page in ATLAS and releases the feedback (this can be set to happen automatically). The page can be unverified and in turn the lock will be removed and the user will be able to continue to edit the asset.</p> <p>NOTE: the locking is only applied to the asset that is submitted and not to any child or linked assets. Locking of child and linked assets will be introduced in a later update.</p>
-------------------------------	---

---

## V5 & V3 ATLAS Enhancements

---

Related to	Enhancement Description
Copying submissions	Workspace managers can now copy submissions from one assignment to another. The feature has been added to the current move submissions functionality found within "Manage Submissions" screen. Submissions can be moved to another assignment in the current workspace or to an assignment in a different workspace.

## 2. Fixes since 1611

### V5 Plus Fixes

---

Related to	Fix Description
Video	A fix has been applied to address the issue where uploaded video content would show as a black frame and not play on some Apple devices.
Re-ordering Workbook and Portfolio Pages	A fix has been applied to allow the workbook creator to move pages within a workbook at the first level only.
Save Reminders	The saving reminder prompt bar in the V5 editor has been changed to appear at 10, 20 and 30 minutes intervals.
External Services	MP4 Video / MP3 Audio files now play inside the media elements of PebblePad – unsupported format will display an error message for the user.
Inter Asset Links	V3 created inter asset links are now functional inside V5.
Share to Web	Administrators can now control if V5 assets are published on the web and indexed on search engines. Previously this only worked with V3 assets.
